Office Action Summary

Art Unit: 1745

1. Claims 22-30 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. (New Rejection)

Claim 22 recites "an unsulfated electrochemically active material". From the reading of the specification, it is unclear exactly what encompasses this active material. Page 11, line 25 through page 12, line 10 outlines the makeup of the positive electrode, however, it is not clear from this portion of the specification what makes up the unsulfated active material and hence the composition of the electrode. Clarification is required.

It is noted that claim 22 comprises an oxide of lead along with a semiconductor in addition to the unsulfated electrochemically active material.

Claims 23-30, dependent on claim 22, fall therewith.

2. Applicant is requested to submit copies of any prior art of which they are aware relevant to the claimed subject matter.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is (703) 308-1795. The examiner can normally be reached on Monday-Friday from 6:30 to 4:00. The examiner can also be reached on alternate Wednesdays.
